(54) SILICON DIOXIDE FOR STABILIZING BEER AND ITS PRODUCTION

(57)Abstract:

PURPOSE: To obtain silicon dioxide for stabilizing beer, which give excellent stabilizing effect without damaging the foam property of the beer.

CONSTITUTION: Silicon dioxide for stabilizing the beer, which has 500-800m²/g specific surface area by BET method, shows pH8.0-9.3 in 5wt.% aq. suspension, is $\leq +4.8$ in acid strength H₀ and 0.8-1.2 μ mol/m² in acid quantity, is obtained by adding simultaneously sodium silicate and a mineral acid into a salt aq. solution under stirring to allow to react with each other at pH3.0-7.0 and 80° C, adjusting the pH of the resulting silica suspension to 3.0-7.0, filtering, washing and dispersing again the resulting silica hydrogel into water and after adjusting the pH to 5.5-8.5, filtering, washing and drying.
